PROFILE SUMMARY

Frontend Developer interested in product-focused engineering with 3+ years of experience building and maintaining production web applications with React, Next.js, TypeScript, and modern frontend tooling. Experienced in designing scalable frontend architecture, state management, performance optimization, monitoring, and reusable component systems. I enjoy working closely with product and design teams to turn complex problems into simple, reliable user experiences.

WORK EXPERIENCES

PROPITO AI ([link](#)). Front-end Engineer

12/2025 - Now | Dubai - UAE (Remote)

PROPITO AI is a real estate marketplace connecting property seekers and investors with residential assets, powered by an AI-driven recommendation engine.

- Optimized web performance across both the consumer-facing platform and internal administrative site, driving average Lighthouse scores from ~76 to 97+ (peaking at 100 in SEO).
- Implemented and maintained key product workflows across all of the projects, handling ongoing feature releases and resolving production bugs for ~2,000 users.
- Engineered a centralized design system and tokenized component library, standardizing UI across 3 platforms and reducing sprint UI delivery time by 25%.
- Collaborated with the CTO to establish frontend architecture standards, streamline pull request review workflows, and keep the codebase clean and easy to maintain.
- Automated continuous testing by integrating Playwright E2E suites into the deployment pipeline, catching errors prior to production releases.
- Introduced PostHog and Sentry monitoring to improve visibility into user behavior, application errors, and production issues, enabling faster debugging and more informed product decisions.

ApplyScore Ltd. ([link](#)). Front-end Developer

10/2023 - 12/2025 | London - UK (Remote)

ApplyScore is an EdTech startup aimed at international students. It uses a dedicated AI model to match students to the best-suited study programs abroad and apply for them.

- Built and shipped the platform's first mobile-responsive experience, unlocking mobile traffic and driving a 50% increase in active users (3,000 to 4,500).
- Delivered and maintained core platform modules alongside the engineering team, contributing to the student referral flow, university partner portal, and multi-language internationalization (i18n).
- Improved SEO scores by ~30% by collaborating with the SEO team and optimizing frontend implementation and page structure.

- Partnered directly with product managers and UI designers to break down product requirements into clear, step-by-step applicant interfaces.
- Reduced frontend bundle overhead through code splitting, lazy loading, and removing unused dependencies, improving application performance.

Maroon co ([link](#)) Front-end Developer 05/2023 – 10/2023 | Khozestan – Iran (Remote)

Maroon delivers industrial monitoring systems, providing telemetry dashboards and supervisory control interfaces for industrial manufacturing operations.

- Developed modular React components and custom hooks with strict TypeScript typing, establishing consistent UI patterns across the internal dashboard.
- Optimized API data fetching with React Query caching, reducing unnecessary network requests and improving application responsiveness.
- Containerized local development environments with Docker, ensuring reproducible runtime dependencies and setup parity across the team.

SKILL SET

Languages

TypeScript JavaScript (ES6+) Python HTML5 CSS3

Frameworks and Libraries

Next.js (App Router, SSR, SSG, Streaming & Hydration) React React Query
Zustand Redux Toolkit React Hook Form Zod React Router React Window

UI and Styling

Tailwind MUI Radix UI Chakra UI Shadcn UI Styled components Scss

Testing and Monitoring

Vitest Playwright (E2E) Storybook Lighthouse Sentry PostHog

Build and Tooling

Vite Webpack Pnpm Docker Git GitHub Actions GitLab CI/CD

Architecture

REST APIs WebSockets PWA MicroFrontend Monorepo Design Patterns

EDUCATION

Bachelor's degree, Computer science 2021 – 2026 | Razi University, Kermanshah

Built a strong foundation in computer science principles with a focus on algorithms and practical problem-solving. Successfully applied these concepts to real-world coding challenges, securing 1st place in the university's Data Structures and Algorithm Competition.
